WANT TO JOIN THE TEAM?

WHAT YOU WILL DO?

You will join a team of talented developers and work on international web applications, e-commerce, and mobile platforms (PWA) with beautiful UX/UI creation and high standards!

- Configuration and management of website architecture, including application, and database layers;
- Participate in "**Technical Engineering**" of a Project, which may include Operational Procedure discovery and recommendations for improvement;
- Relational database design and development;
- Lead Custom Development Projects, with or without, internal and externally based Developers/ Project Managers;
- Troubleshooting and resolution of production issues;
- Continued development of new and existing websites, adding functionality and improving existing operations;
- QA testing code.

WHAT YOU WILL NEED TO HAVE?

We are seeking a **Backend / Fullstack Developer** who is keen to use the very latest in web technologies and experienced in developing highly polished websites for clients. Strong passion for web development, eagerness to apply new technologies at work.

You will be working closely with our amazing design team, other front-end developers, team leaders, and project managers to deliver world-class publicly visible websites.

- Experience in **PHP** and/or JavaScript web development, systems integration;
- Experience with internal and external applications, Unix or Linux;
- **Magento** or framework experience (Symfony, Laravel);
- Able to write **well-structured, maintainable** code;
- **Can-do-attitude** and put the goals of the team before your own prestige;
- You are able and hungry to take on a lot of **responsibility**;
- Able to communicate, read, and write in **English**.

Sutunam

YOU'LL LOVE WORKING!
