FRENCH TELECOM & BROADCAST ASEAN TOUR

23rd March to 1st April
2015

Organized by:

Business France is the national agency supporting the international development of the French economy, responsible for fostering export growth by French businesses, as well as promoting and facilitating international investment in France.

It promotes France's companies, business image and nationwide attractiveness as an investment location, and also runs the VIE international internship program.

Founded on January 1, 2015 through a merger between UBIFRANCE and the Invest in France Agency, Business France has 1,500 personnel, both in France and in 70 countries throughout the world, who work with a network of public- and private-sector partners.

Mobile: +33 6 22 51 04 68

BMI-SYSTEM is a software editor providing NAYA, a solution in Saas mode for enterprises. This solution automates and optimizes business processes in your enterprise such as customer relation management (CRM), contract approval process, event management or document validation process.

BMI-SYSTEM has also created GENOC, a tool for rapid mobile application development. Thanks to this tool, you can easily create applications in native code, working offline for mobile devices (iOS and Android). Those applications can be integrated easily with the NAYA solution or with any system such as ERP ou CRM

Romain WERYK
Technical Sales Engineer - Smartmetering & IoT
Email: r.weryk@kerlink.fr
Mobile: +33 6 46 21 66 58

For nearly ten years, **KERLINK** has been firmly customer-oriented, using its technical skills, its capability for innovation, its energy and enthusiasm to meet its customers' many different requirements. In a rapidly expanding machine-to-machine market, KERLINK has developed a comprehensive range of solutions for communication between companies' information systems and fixed equipment, such as electricity meters, and vehicles, such as public transport and railway wagons. KERLINK has developed a product designed for IoT : the LoRa IoT Station.

It's a base-station with long range and low bitrate dedicated to M2M & Internet of Things connectivity service providers that want to manage their network by themselves. The Long Range IoT Station embeds the Long Range "LoRa" technology, developed by Semtech. It enables to collect data transmitted by remote devices, such as meteorological stations, road panels, doors...

Be-Bound

Michel KITAREFF
VP Business Development US & Asia
Email: mktitareff@be-bound.com
Mobile: +1 415 260 0590

BE-BOUND is the first hybrid solution to stay connected on your smartphone even when there is limited or no data access. Be- Bound is an innovative cloud technology using very low band-width that delivers the best user experience even with low connection. With Be-Bound Application you can exchange emails, Tweets, search for a restaurant and many other services, even when there is no 3G, Edge or Wi-Fi. Be-Bound unique technology is network agnostic from 4G to 2G included and works without any infrastructure investment, with any telecom carrier.

Viaccess-Orca is a visionary partner for content service providers worldwide, thanks to its ability to shape the ultimate content experience wherever viewers are and on whatever device they choose to consume content. The media environment is moving fast, giving the content consumption market a number of continuous technological and business challenges. With integrated products and innovative, business savvy solutions, Viaccess-Orca helps content service providers gain a competitive edge in this market of unmanaged networks and IP-connected devices. Since the user experience (UX) is a critical success factor for operators today, Viaccess-Orca's solutions focus on delivering engaging experiences on all platforms for a new entertainment world. The company assists service providers in creating long term loyalty on the customer journey to discover, choose and consume content in a secure manner. Viaccess-Orca is part of the Orange Group.
