

Détail de l'offre : Experienced Project Manager in Renewable Energies

Partenaire	Chambre de Commerce et d'Industrie Franco-Mexicaine
Adresse	Protasio Tagle 104 Col. San Miguel Chapultepec Del. Miguel Hidalgo
Code postal	11850
Ville	Ciudad de México
Référence	20D1583183986
Titre	Experienced Project Manager in Renewable Energies
Description du poste	To ensure our development, we are looking for an experienced Project Manager specialized in renewable energies operation, mainly focusing on solar energy, to join the Customer Success team.

The Project Manager, in charge of Customer projects and relationships, is responsible for coordinating multiple work streams to ensure on-time delivery of Customer projects and ensures the highest level of Customer satisfaction.

The main functions of this role will be to:

- * Build and sustain strong client relationships
- * Manage feasibility, deadlines and quality of Customer projects implementation in Quantum®
- * Manage feasibility and implementation of Customer specific requests, KPIs and analyses to customize the Quantum® environment in relation with junior technical engineers
- * Manage project review meetings with the Customer
- * Stay attuned to Customer needs and ensure the highest level of reactivity (new KPI, new analysis, report creation, etc.)
- * Present and help the Customer to quickly familiarize with new features in Quantum
- * Assist Customers along the way on current and future projects
- * Create and maintain comprehensive project documentation
- * Report and escalate to management as needed

The new Senior Project Manager will join a multi-cultural team in a constantly growing company, working in a very exciting and attractive field.

Type de contrat	Emploi
Société	QOS Energy powers Quantum
Description de la société	At the nexus of cloud computing, the Internet of Things and renewables, QOS Energy powers Quantum®, a cloud based renewable platform dedicated to technical asset management of renewable plants and storage facilities.

Quantum® collects data from millions of sensors and devices deployed across multiple solar, wind, biogas, hydro, storage and hybrid assets. The data is transformed into comprehensive analytics enabling professionals as varied as plant managers, analysts, energy traders and maintenance engineers to significantly improve operational processes and financial returns for more than 7 000 facilities worldwide, including 10 GW of renewable power.

Operating in 23 countries worldwide, QOS Energy has offices in Europe, USA, Mexico and India.
