Description du poste	On behalf of one of its clients the French Chamber of commerce is looking for a

FRENCH-SPEAKING SALES ENGINEER

Our client is specialized in designing and manufacturing filling and capping machines for all liquid products. They are internationally recognized thanks to their know-how, their quality and their products reliability.

Created and headquartered in France 30 years ago, our client has developed sales and services operations across Asia, with their subsidiary in Singapore since 2013.

Our client is looking for a Sales and Service Project Engineer to support their sales and service team in Asia.

RESPONSIBILITIES

Reporting directly to the Operations manager of the subsidiary, and working with both sales and service teams you will be in charge of:

Supporting the sales team by quoting, and providing technical proposal for new filling machine.

Read, and proceed technical request from customer (URS) either regarding new machine or service offer.

Provide service quotation to customer such as: Retrofit, Parts, Maintenance...

Discussing with the team in France to ensure that all technical aspect, of your project are respected (design and manufacturing phase)

Project management of your service projects from order to completion, with the team in France and the local team (planning, technical support, customer review...)

Requirements

Technical background to understand the company product, and the customer requirement

Proven ability to drive different project at the same time

Good organizational skills including project management

Strong written and verbal communication skills to communicate with customers, report to your manager, discuss with the team based in France

Curious, structured, open mindset, and team worker, are your main skills to integrate the team.

Packaging/Filling or automated machinery experience will be a strong plus

Qualifications:

Engineer Degree in mechanic, or automation

3+ years of successful experience in technical environment as project engineer, or customer service

Fluent in English, and French speaking will be highly appreciated to liaise with the French team (HQ)

Benefits:

Basic Salary +yearly Bonus

Full time job based in Singapore

Travelling (asap) through South East Asia territories, and part of Pacific and France

Only Singapore-based candidates will be considered
